Analysis

Transaction Pattern

- **High-frequency attempts:** 11 transactions within 34 minutes
- **Consistent amount:** All transactions for £1.00
- **Geographic spread:** Primarily London, with one US transaction
- **Merchant variety:** ATMs, retail stores, and banking services

Decline Reasons Breakdown

- **Transaction not permitted:** 4 transactions (36.4%)
- **Incorrect PIN:** 4 transactions (36.4%)
- **PIN tries exceeded:** 2 transactions (18.2%)
- **Restricted card:** 1 transaction (9.1%)

Merchant Analysis

- **NatWest ATM:** 4 attempts (most frequent)
- **Sainsbury's PIN+Cashback:** 4 attempts

- **Tesco Centre:** 1 attempt
- **First Third Bank (US):** 1 attempt

Security Concerns

Red Flags

1. **Rapid successive attempts** across multiple merchants
2. **International transaction** (US bank) mixed with UK transactions
3. **PIN-related failures** indicating potential unauthorized access
4. **Card restriction** activated during the sequence

Timeline Analysis

- **21:54-22:12:** Initial attempts marked as "not permitted"
- **22:13-22:16:** PIN-related failures begin
- **22:16:** First "PIN tries exceeded" warning
- **22:18:** Card becomes restricted
- **22:22:** Second "PIN tries exceeded"
- **22:24-22:28:** Continued incorrect PIN attempts

Recommendations

Immediate Actions

1. **Contact customer** to verify if transactions were legitimate

2. **Review card security status** and restrictions
3. **Monitor account** for any further suspicious activity
4. **Consider temporary card suspension** if fraud suspected

Security Measures

1. **PIN reset** may be required
2. **Fraud investigation** should be initiated
3. **Geographic restrictions** should be reviewed
4. **Transaction limits** evaluation

Customer Communication

1. **Verify customer identity** before discussing transactions
2. **Explain security measures** taken to protect account
3. **Guide through PIN recovery** process if needed
4. **Update contact preferences** for fraud alerts
